K. TEJA KARTHIK

Backend & AI Software Engineer

teja.karthik.5505@gmail.com | karthik-kona | tejakarthik657 | +91 76739 23505
Warangal, Telangana, India

Professional Summary

Computer Science undergraduate with interests in problem-solving, innovation, and practical solutions to real-world challenges. Strong in analytical thinking, teamwork, communication, adaptability, and continuous learning.

Education

B.Tech. in Computer Science and Engineering, Kakatiya Institute of Technology and Science, Warangal **2023–2027 — CGPA: 7.62/10 — Full-time**

Intermediate (MPC), Sri Chaitanya Junior College **2021–2023 — 82% — Full-time**

SSC (10th), Alphores High School **2021 — CGPA: 10/10 — Full-time**

Technical Skills

Languages: Python, JavaScript
Backend: FastAPI, Node.js, Express.js, REST APIs, Event-Driven Architecture, WebSockets, OAuth 2.0, JWT, RBAC, Rate Limiting, Message Queues, Webhooks.
AI: LLMs, RAG, AI Agents, Prompt Engineering, AI APIs, LLM Orchestration.
Databases: MongoDB, PostgreSQL, Vector Databases.
DevOps: Docker, Git, GitHub, CI/CD.
Frontend: Next.js, Tailwind CSS.
Tools: Postman, VS Code, Docker, GitHub Actions, Redis, GitHub, Ollama, LangChain, Qdrant, Hugging Face, Vercel, Render, MongoDB Compass, Amazon EC2.
AI-Assisted Engineering: AI Coding Agents, Context Engineering, Agentic Workflows, Repository-Aware Development, AI-Assisted Debugging, Test Generation, Code Review Automation.

Experience

Freelance Software Engineer – DevFrames **Aug 2026 – Present**

- Built **2+ AI-powered products and client solutions**, owning backend architecture, APIs, databases, LLM orchestration, automation, and deployment.
- Evaluated open-source and emerging AI technologies and integrated reusable engineering patterns into product development workflows.

Backend Engineer – Aform Solutions **Feb 2026 – Jun 2026**

- Engineered backend services for a car-pooling platform, implementing **REST APIs, ride discovery, driver–passenger matching, trip workflows, and data handling**.
- Designed modular business logic and backend components for maintainable application development.

Junior Software Engineer Intern – SuPrazo Technologies **Aug 2025 – Feb 2026**

- Developed backend and application features using **REST APIs, MongoDB, Git, and modular service architecture**.
- Debugged application issues through testing, logging, and code refinement to improve reliability.

Web developer Intern – Svapps **Mar 2025 – Jun 2025**

- Developed SEO Friendly Static Websites For Small Scale 9+ Businesses **Google Search Console, Next.js**.

Projects

FrameUp – AI-powered operating system For Local Business Live Demo

- FrameUp is an AI-powered operating system with **40+ peers**, built specifically for Indian MSMEs and local business owners to manage operations, billing, and growth effortlessly beyond legacy tools like Tally.

TerritoryRun – Tactical Gamming Interface Live Demo

- TerritoryRun is a real-world, multiplayer fitness game with **30+ peers**, that transforms outdoor running into strategic territory conquest by capturing Uber H3 hexagonal cells and waging faction turf wars in real time.

Vibe – AI Developer Engineering Platform

- AI developer platform tested by **15+ developers and students**, combining Python backend services, LLM orchestration, APIs, automation, and VS Code workflows VIBE VS Code Extension

VeriDoc AI – Enterprise Agentic RAG Platform Live Demo

- Architected VeriDoc Synapse, an AI ActionMesh connecting FDA protocols to live hospital EHRs via Hybrid RAG v2 and bidirectional Model Context Protocol (MCP). Automated clinical contradiction detection and EDC protocol.

Achievements & Additional

Achievements: Participated in Public Hackathons, Innovation Challenges, and Technical Events.
Interests: Problem-Solving, Team Collaboration, Business Operations, Innovation, and Emerging Trends.
Core Strengths: Communication, Analytical Thinking, Adaptability, Creativity, Time Management, Decision-Making.
